We Couldn’t Do This Without You.

A Year in Review – FY 2015

KentuckyOne Health®
Flaget Memorial Hospital Foundation
Over the past year, the Flaget Memorial Hospital Foundation provided critical philanthropic support made possible by our generous donors. As the new Division Vice President of Development for KentuckyOne Health, I’m humbled to learn how your gifts have literally changed and saved lives through advancement in treatments and technology.

Without you, we wouldn’t be able to invest in technology and infrastructure including a $400,000 investment from the Flaget Memorial Hospital Foundation for the purchase of a new 80-Slice CT-scan. KentuckyOne Health and Catholic Health Initiatives matched the donation. This specialized equipment allows radiologists to more easily diagnose cancers, cardiovascular disease, trauma, infectious diseases and musculoskeletal disorders.

This is just one example of the power of medicine through innovation and exceptional clinical care that is bringing wellness, healing and hope to the communities we serve. And you are the fuel that allows KentuckyOne Health to empower healing hands to lift up those in need.

We hope you enjoy reading about these exciting breakthroughs and others – events that without you, would not have been possible. From the bottom of our hearts we sincerely thank you for your generosity and support as we look forward to another year of building a healthier Kentucky.

We Couldn’t Do This Without You,

Leslie Buddeke Smart, CFRE
Division Vice President of Development
KentuckyOne Health
About Flaget Memorial Hospital

Since its inception, Flaget Memorial Hospital has been committed to serving the people in Nelson County and surrounding communities — caring for everyone who walks through our doors — regardless of their ability to pay. This work started with Sisters of Charity of Nazareth and their commitment to caring for the sick long.

The first hospital was built in Bardstown in 1951. The current facility was built in 2005. Today, Flaget is a 52-bed hospital that offers a full-range of services and serves the people of Nelson, Marion, Washington, Bullitt, Larue, and Spencer Counties. In Fiscal Year 2015, Flaget provided care to 2,050 patients in the hospital, treated 21,340 patients in our Emergency Room, welcomed 280 babies into the world, had 44,806 outpatient visits (non-emergency), performed surgery on 3,858 patients, provided access to care for 64,785 people in our physicians’ offices (a 47% increase over FY2014), and had 5,730 medical oncology visits and 2,021 radiation oncology visits.

At Flaget, our core strategies are people, quality, stewardship and growth. We put our patients and community at the center of every decision we make, including the purchase of equipment and supplies. This tradition has been complimented with our membership with Catholic Health Initiatives and KentuckyOne Health, the largest health system in the Commonwealth.

Flaget Memorial Hospital Foundation
Because of supporters like you, Flaget Memorial Hospital Foundation donated $400,000 to the hospital for the purchase of a new 80-Slice CT-scan. KentuckyOne Health & Catholic Health Initiatives matched the donation. The CT-scan is a critical diagnostic tool that shows a 3-D view of the section of the body being studied so that physicians are able to detect some conditions that conventional X-ray images cannot. CT-scans are useful for monitoring a patient’s progress during and after treatment. The CT imaging is particularly useful because it can show several types of tissue—lung, bone, soft tissue and blood vessels—with great clarity. Using specialized equipment and expertise to create and interpret CT-scans of the body, radiologists can more easily diagnose cancers, cardiovascular disease, trauma, infectious diseases and musculoskeletal disorders.

“This is in-line with our mission statement and what the Foundation works for—to be able to support the hospital—particularly when there is a great need like this one,” said Jim Rogers, Flaget Foundation Board Chair (FY2015). “Our partners to the hospital should know that they do make a difference and can affect people’s lives in this community.”

Without You, There Wouldn’t Be A High-tech CT Scanner.

Flaget Memorial Hospital was awarded a grant from WHAS Crusade for Children to purchase a new infant warmer bed for Flaget’s Birth Center, and the Flaget Memorial Hospital Foundation provided matching funds. The care provided to an infant during the first hours after birth has a major influence on the health and well-being of that child. It’s very easy for a baby to get cold, especially at the time of delivery. If not kept warm, the baby is susceptible to hypothermia. This is especially true for special-needs babies who are born prematurely, with Down syndrome, alcohol or drug dependent or having a major birth-defect. The new infant warmer bed is designed to better protect the baby and provide accessibility for resuscitation or procedures without jeopardizing thermal stability.

“This was an important need for us, and we are so grateful to Crusade for Children for their continued support of our hospital and our youngest patients,” said Sue Downs, president of Flaget Memorial Hospital. “I also want to thank the Flaget Memorial Hospital Foundation for providing matching funds to help us purchase this lifesaving equipment.”

Flaget delivered more than 260 babies this past year and approximately 16,000 babies have been delivered at the hospital its founding in 1951. “Flaget serves a six-county population, and we believe every baby born here should have the best start in life,” said Downs.
Without You, We Wouldn’t Have A Facility That Serves Our Community.

On June 25, 2015, staff members, volunteers, board members and members of the Sisters of Charity of Nazareth (SCN) congregation came together for a celebration marking 10 years in the current location of Flaget Memorial Hospital, part of KentuckyOne Health. The current facility opened its doors on KY 245 in the summer of 2005.

Flaget President Sue Downs spoke about the opening of the original hospital near downtown Bardstown in 1951.

“It meant that doctors could deliver infants in a safe setting equipped for emergencies, rather than helping women birth babies in farmhouses,” Downs said. “In addition, it meant that patients coping with a crisis, like a ruptured appendix, wouldn’t need to journey to Louisville for care. Because Bardstown had a hospital – countless lives were saved.”

Former Flaget President Bruce Klockars, who supervised the building of the new hospital at the current site, spoke of the many awards the facility has won, including being named one of America’s 100 Top Hospitals five times; a Joint Commission Top Performer on Key Quality Measures; one of Becker Hospital Review’s Top 65 Great Community Hospitals in the nation; a J.D. Powers & Associates Distinguished Hospital for Inpatient Service Excellence; and a Cleverly & Associates Community Value Five-Star Hospital.

SCN President Sister Susan Gatz told those assembled that Flaget Hospital’s staff members have continued the traditions of the SCNs, who founded the hospital. In keeping with the hospital’s faith-based heritage, the Rev. Karl Lusk, Flaget’s chaplain coordinator, offered a prayer of rededication of the Flaget campus and all who provide health care there.

LEFT: The groundbreaking for Flaget’s original hospital, which opened in 1951.
ABOVE: The groundbreaking for the current hospital, which opened in 2005.
Without You, We Wouldn’t Be Able To Diagnose, Monitor And Treat In Just One Visit.

The Flaget Memorial Hospital Auxiliary donated $17,300 to the Flaget Memorial Hospital Foundation for the purchase of a new Piccolo Chemistry Analyzing System for the laboratory and Flaget Cancer Center. The funding was made possible from proceeds from the Flaget Auxiliary Gift Shop.

The analyzer enables the hospital to better diagnose, monitor and treat patients in a single visit—eliminating the need to follow-up after the patient has left.

“We are extremely grateful for all our auxiliary does,” said Sue Downs, president, Flaget Memorial Hospital. “With the purchase of this new system, we will reduce test turnaround times and therefore, make more timely medical decisions, which will improve patient care. This system will especially help our cancer patients who need a blood test before they can receive treatment. With our last system, receiving results would take hours—now it will only take 12-15 minutes and will require only a small blood sample. This funding will have a dramatic impact on practice operations.”

Without You, Our Neediest Neighbors Wouldn’t Have Breast Cancer Screenings.

The Flaget Yes Mamm! program, started in 2011, has provided educational outreach to underserved areas, free clinical breast exams and mammograms, and diagnostic testing and treatment to uninsured/underinsured women in Flaget’s service-area to bring awareness to the seriousness of prevention and early detection of breast cancer and has saved many lives.

The $5,000 donation from the Flaget Auxiliary & Gift Shop will be used strictly for patient care—mammograms, diagnostic testing and treatment.
Without You, Patients With Carpel Tunnel Wouldn’t Get Quick Relief.

The Flaget Memorial Hospital Foundation received a nearly $10,000 gift from the Flaget Auxiliary and Gift Shop to support the purchase of an endoscopic carpal tunnel surgical system for minimally invasive procedures at Flaget Memorial Hospital. Carpal tunnel syndrome is the numbness, tingling, weakness or other problems in the hand as a result of pressure on the median nerve in the wrist, which runs from the forearm to the hand through a small space in the wrist called the carpal tunnel. The new system has multiple benefits for patients, including shorter recovery times and less pain than open carpal tunnel surgery. The system also shortens the procedure time, which means less time in the operating room for patients. The endoscopic procedure takes approximately 35 minutes.

“We are truly grateful to the volunteers of the Flaget Auxiliary for this donation,” said Sue Downs, president, Flaget Memorial Hospital. “Our patients who need carpal tunnel surgery will experience multiple benefits and return home to their families faster.”

Without You, Our Programs Wouldn’t Be As Strong.

The Flaget Memorial Hospital Foundation’s Annual Employee Giving Campaign raised $33,255 for much needed funding for patient and employee programs. The annual March Madness tournament had 68 teams with 70 percent of employees giving.

Programs that will benefit from the campaign include the Flaget Cancer Center, Nelson County Community Clinic, Bruce Klockars Scholarship Fund, Employee Assistance Fund, Patient and Family Assistance, Prescription Assistance, Surgical Services and Flaget’s Greatest Needs.

“I am always impressed by the giving spirit of our employees,” said Sue Downs, president, Flaget Memorial Hospital. “We just went through some difficult financial times and our employees really showed how truly dedicated they are to the patients and their colleagues.”
Without You, Our Greatest Needs Wouldn’t Be Met.

The Flaget Memorial Hospital Foundation hosted its third annual golf scramble on Friday, June 26, 2015 at the Bardstown Country Club at Maywood. The presenting sponsor was the Flaget Memorial Hospital Medical Staff.

This year’s event raised $38,000, which will support the hospital’s Greatest Needs Fund. This fund allows the hospital to purchase essential new medical equipment, hire or train new staff, cover the costs of care for patients who would otherwise be unable to afford treatment or launch critical new programs. Philanthropic partnerships with the community allow Flaget Memorial to continue its to bring wellness, healing and hope to all, including the underserved.

“We were honored by the tremendous support we received from the Foundation’s third annual tournament,” said Sue Downs, president, Flaget Memorial Hospital. “Each dollar raised makes a tremendous impact on our patients and community.”

Without You, Employees Wouldn’t Have Support For Continuing Their Education.

On Friday, September 5, 2014, Flaget Memorial Hospital Foundation hosted a luncheon that raised over $18,000 to support the Bruce Klockars Employee Education Fund, which provides scholarships to hospital employees to continue their education.

Bill Samuels, Jr., chairman emeritus at Maker’s Mark Distillery, was the featured speaker at the event. Samuels is a seventh generation bourbon distiller. He oversaw the tremendous growth of the Maker’s Mark brand for more than forty years, while serving as a leader of many charitable causes and service organizations.

The Bruce Klockars Employee Education Fund was established in 2011 and has provided more than $22,000 in scholarships to Flaget Memorial Hospital employees. The fund is designed to enable the hospital to further enhance nursing and other health care professions by supporting continued education and other professional growth for the staff who show
Without You, Our Community Wouldn’t Get Free Health Screenings And Education.

The Flaget Memorial Hospital Foundation hosted its third annual health fair on Saturday, September 27, 2014. More than 500 community members attended and received free health screenings and education. Attendees also had the opportunity to talk to health professionals and community program representatives, watch healthy cooking demonstrations and more. In addition to Flaget Memorial Hospital programs, more than 50 community health partners participated in the fair.

The event would not be possible without the generosity of sponsors and the time commitment of many community health partners, employees and auxiliary volunteers.
Flaget Memorial Hospital was awarded a grant of $293,650 from Catholic Health Initiatives’ Mission & Ministry Fund to support violence prevention initiatives in Nelson County. The hospital, working with five Nelson County high schools—Bethlehem, Nelson County, Thomas Nelson, Bardstown and Horizons Academy—will implement the Green Dot Program over a three-year period.

Green Dot originated at the University of Kentucky and has become a national model for bullying intervention. The Green Dot strategy is a comprehensive approach to violence prevention that capitalizes on the power of peer and cultural influence. It targets all community members as potential bystanders and seeks to engage them through awareness, education, and skills-practice, in proactive behaviors that establish intolerance of violence as the norm.

The Green Dot Program will work to reduce the number of high school students who report being physically or verbally threatened, attacked or hurt at school. The program will educate the Nelson County community about bullying and other aggressive acts and give the youths in the community the knowledge to identify aggressive acts and the skills to reduce the number of incidents.
“Green Dot will supply the community with the right skills and expertise on how to handle and reduce further bullying incidents,” said Sue Downs, president, Flaget Memorial Hospital.

Since it was established in 1996 with guidance from the health system’s founding congregations, the Mission and Ministry Fund has awarded 452 grants totaling more than $63 million to programs across the globe. The fund was established through contributions from Catholic Health Initiatives’ facilities across the nation.

“As providers of health and health care, we see the human cost of violence every day as victims come to us for emergency services,” said Kevin Lofton, president and chief executive officer of Catholic Health Initiatives. “Violence prevention is a system wide, long-term commitment for us. With the help of grants from the Mission and Ministry Fund, our local organizations are doing excellent work. They are moving 'upstream' to find the places and situations in which violence can be prevented.”

Without You, Our Team Couldn’t Respond To Emergencies So Quickly.

With funding from the Small Rural Hospital Improvement Program (SHIP), Flaget Memorial Hospital Emergency Department has implemented the LIFENET System, which allows the hospital emergency care team to respond much quicker to critical patients being transferred into the hospital via Emergency Medical Services (EMS). EMS is able to transmit Electrocardiogram (ECG) information for patients with cardiac issues through the comprehensive delivery system (LIFENET).

“The care team will know exactly what to expect before the patient reaches our doors. We can assemble and brief the team in advance so that we can be efficient and effective when patient arrives,” said Norma Goss, MSN, RN chief nursing and operating officer, Flaget Memorial Hospital. “It’s all about what is best for that patient. Faster response times lead to better patient health outcomes.”
Thank You

Donors made a real difference in 2014 and 2015. The Flaget Memorial Hospital Foundation pays tribute to all the individuals, companies and foundations that make a tangible difference through their philanthropic investment in outstanding patient care facilities and services, the education of health caregivers, advanced clinical research and improved access to quality medical care.
